Release Agreement for Research Materials

ISE Lab

January 2008

ISE Lab is involved in an ongoing effort to develop these datasets of synchronized videos and ground-truth data.

The aim of these datasets is to develop new techniques, technology, and algorithms for the automatic evaluation of human behaviours in image sequences (i.e. motion detection, tracking, recognition and interpretation)

Consequently, the datasets provided here are meant to aid research efforts in the general area of developing, testing and evaluating algorithms for human behaviour understanding.

Users of the ISE Lab ground-truth must agree to the following terms:

1. If the ground-truth is used, in whole or in part, for any publishable work, the following paper must be referenced:

    Jordi Gonzàlez, F. Xavier Roca, Juan José Villanueva, " HERMES: A Research Project on Human Sequence Evaluation ", in Computational Vision and Medical Image Processing (VipIMAGE'2007), Porto, Portugal, October, 2007.

2. The models and data from the ground-truth will not be used for illustration in scientific articles or presentations, unless the users should refer the aforementioned paper.

3. Any use of these databases and ground-truth in the development of a commercial product, or the distribution or sharing of the data with a third party, is prohibited: this material will be used for teaching or not-for-profit research purposes only.

4. In particular, no express or implied licenses or other rights are provided to use these databases or any related intellectual property of the ISE Lab for commercial purposes.
